Testimony for HB 4795

HB 4795, is a "Super Preemption" Bill, to allow extremist gun groups and individuals to sue cities and municipalities for violations of a law that tells local governments they can't make local gun safety laws. Unfortunately, the conversation has been completely dominated by the Gun Lobby.

HB 4795 would funnel Michigan's local tax dollars to out-of-state groups representing the financial interests of gun violence profiteers. This is an outrageous move to silence any local government taking action to stop the epidemic of gun violence in our municipalities. And if passed, our cities, towns and villages - our Michigan - will be on the hook for attorney fees and money damages!

It's hard enough to pay for education and municipal services - especially during the Flint crisis - I do NOT think Michigan should be paying for the NRA's extreme views.
